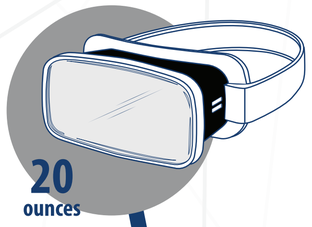
5G Technology Capabilities

Added frequencies, massive upgrade in traffic capacity, and better spectrum efficiency enable revolutionary network performance

All-Day Augmented Reality

5G and Edge computing offload processing for lighter, smaller glasses



First Responders Save More Lives

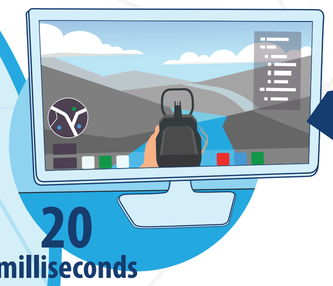
Better sensing devices and network-assisted AI for difficult conditions

Medical Telepresence

See the best specialists in your local clinic

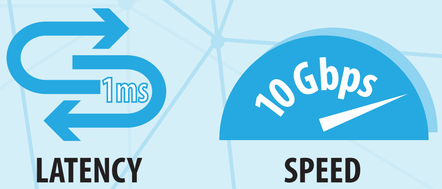
Lag-Free Gaming

Almost instant response time in Massive Multiplayer Online games



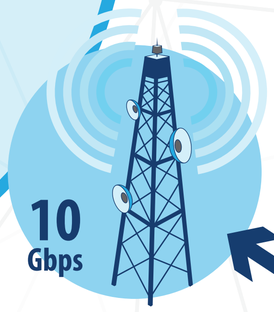
Connected Cars and Smart Roads

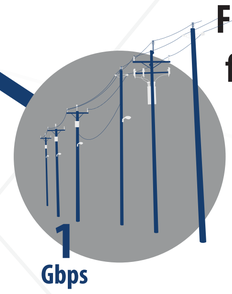
Say goodbye to gridlock with smoother, more coordinated traffic

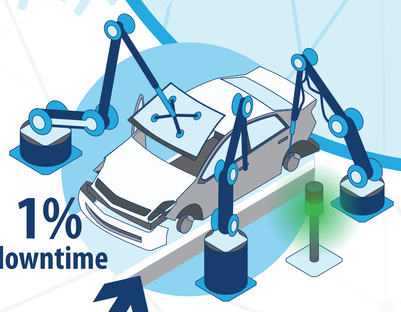


Broader Broadband

Free your home Broadband from cable, DSL, and even fiber speed limits

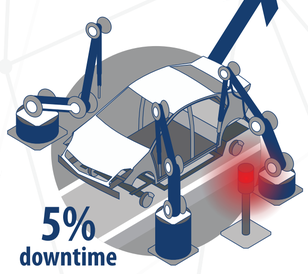


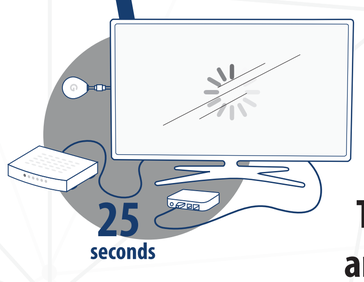




Increased Factory Uptime

Real-time equipment and supply monitoring keeps factory lines running





Truly Live Streaming

Take your favorite TV shows or live sports anywhere without the dreaded “buffering”
